

DoD 8570.01-M Information Assurance Workforce Improvement Program

What is DoD 8570.01-M?

DoD 8570.01-M provides guidance for the identification and categorization of positions and certification of personnel conducting Information Assurance functions within the DoD workforce supporting the DoD Global Information Grid (GIG) per DoD Instruction 8500.2. Approved certifications are shown in the table below.

Who is required to Comply?

The DoD IA Workforce includes, but is not limited to, all individuals performing any of the IA functions both Government Employees and subcontractors. This baseline covers both technical and management IA skills among personnel performing IA functions across the DoD enterprise.

How Can ITT Help?

ITT, a respected leader in Information Assurance within both the commercial and government sector, has established an aggressive training program to help its partners and customers comply with the DoD 8570.01-M directive. We offer public classes as well as private, onsite classes, and we can custom tailor a training program for your organization. Whether you have one person or an entire team of staff that needs to comply, ITT can meet your training needs.

In addition to domain expertise in each of the certifications, ITT instructors bring real-world information security experience to the classroom. Our instructors also regularly perform network and application assessments, and they bring that hands-on experience to the classroom to provide concrete examples for the material they are teaching. Not only do our students gain the necessary knowledge to pass the certification exams; they also draw upon the real-world knowledge of the ITT instructors to understand how the course material applies to their network environments.

What classes are offered pertaining to 8570.01-M?

ITT offers classes in the following certification areas (also highlighted in red text on the table):

- Security+™
- SSCP™
- CISSP™
- CISA™
- CISM™

Along with these certification prep classes, ITT also offers a full suite of security, forensics, information assurance, and penetration testing classes to take your security training to the next level.

Locations

ITT offers public classes at various venues around the world. We can also provide private training onsite at your facility.

Course Materials

All materials including courseware, study guides and CD's are supplied

Duration

Classes range from four (4) to five (5) Days

Will I/Employees get Certified?

ITT instructors currently have over a 90 percent pass rate. If for some reason a student does not attain their certification they may attend the course again at no charge.
