

Security+ Prep

CompTIA Security+ validates knowledge of communication security, infrastructure security, cryptography, operational security, and general security concepts. It is an international, vendor-neutral security certification that establishes baseline knowledge in security, and security requirements in today's business world. This course and certification meets the requirements for the DOD 8570.1 directive for IAT level II, and IAM level I requirements.

This course is based on the CompTIA standards and guidelines for instruction and prep for their Security+ certification test. Not only will you gain the necessary knowledge to pass the exam, you will experience the real-world knowledge of the ITT instructors and how each module pertains to the real world of security, not just book knowledge.

Who Should Take This Class

This course will benefit security officers, auditors, security professionals, site administrators, and anyone who is responsible for the integrity of their organization's network infrastructure.

A CompTIA Security+ certified individual has successfully proven holding a foundation-level of skill and knowledge in General Security Concepts, Communication Security, Infrastructure Security, Basics of Cryptography and Operational / Organizational Security. Candidates are recommended to have two years experience in a networking role with preexisting knowledge of TCP/IP, experience in a security related role, CompTIA Network+ or equivalent certification, and adequate training and self-study materials.

Course Materials

Security+ prep Guide
Security+ Lab Book
CD with all tools
